

An aerial photograph of a lush, green forest with a winding river. The river flows through the center of the image, curving to the right and then back to the left. The forest is dense and vibrant green, with the river appearing as a bright blue-green line. The overall scene is a natural, undisturbed landscape.

[https://youtu.be/OEZBeZ\\_OP3w](https://youtu.be/OEZBeZ_OP3w)

# Key Characteristics

Accessible to all supply chain actors and relevant stakeholders free of charge

Applicable globally for any commodity

Secure login for supply chain portfolio upload and management

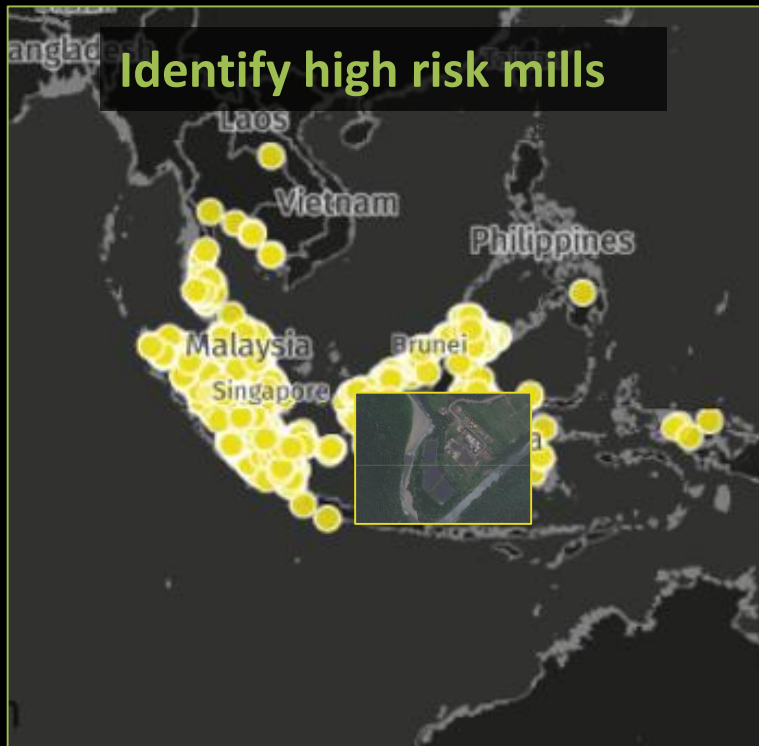

Packaged analysis, insights for decision making, and ability to share results along supply chains

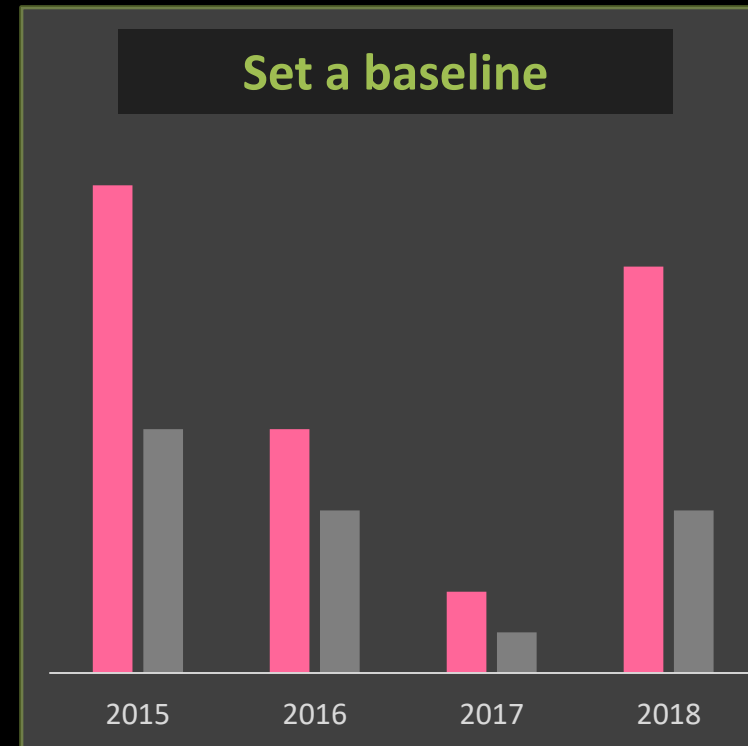

Impact-based analysis for voluntary sustainability reporting

# GFW Pro in Action

*“Olam is actively monitoring over 1,000 palm oil mills using GFW Pro, which has enabled us to identify those that are at high risk and use the analysis to engage and request action from both our direct and indirect suppliers.”*  
**-Laila Wilfred, Assistant Manager Sustainability at Olam International Limited**

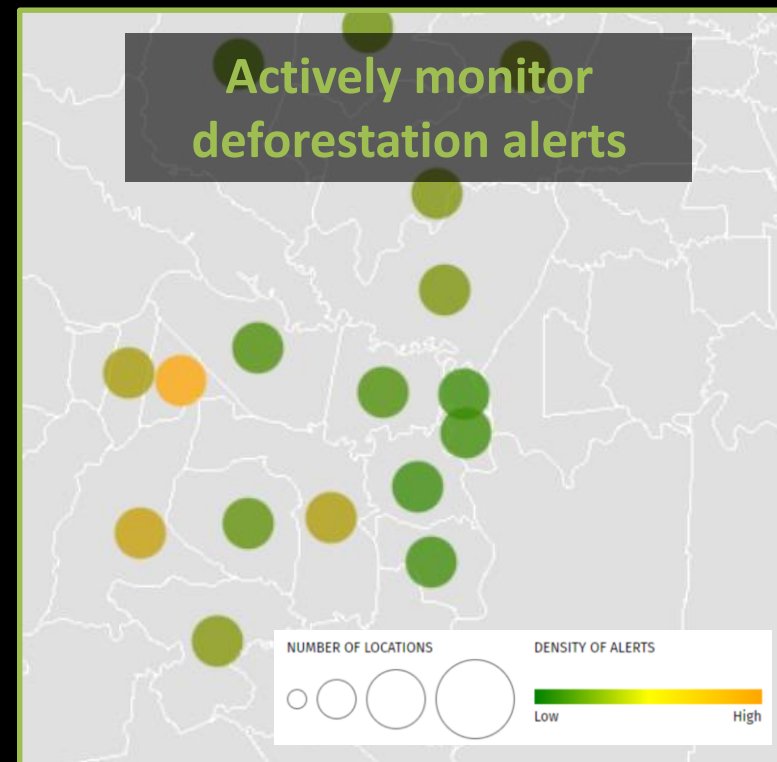

*“GFW Pro helps bring Cargill’s vision of transparent and traceable cocoa supply chains to light. With this system, we can collaborate directly with our partners to measure and monitor deforestation risk.”*  
**-Taco Terheijden, Sustainability Director for Cargill Cocoa & Chocolate**

*“Now in just an instant with GFW Pro, our clients can unlock answers to questions that were previously inaccessible. Our banks can quickly find out if their client’s farm is in good legal standing, or potentially located in a risky or illegal area.”*  
**-Colin Mckee, Environmental and Social Officer, IDB Invest**

*“We were able to use GFW Pro together with farmers in Paraguay to help audit sustainability schemes for soy production. We constantly watch for deforestation alerts from GFW Pro and review high risk locations every six months.”*  
**-Guy Hogge, Global Head, Sustainability, LDC**
